Unless otherwise stated all quality control samples performed within specification established by the Laboratory. The expanded measurement of uncertainty for D9-THC has been determined to be 4.4%. Therefore any samples that have a dry weight concentration of up to 0.3132% are determined to be within the acceptable hemp D9-THC concentration of 0.3% or less.

The reported result is based on a sample weight with the applicable moisture content for that sample. Unless otherwise stated all quality control samples performed within specification established by the Laboratory. Terpene analysis result is an estimate as the sample response is typically outside the standard curve linear response.
